EDUCATION

Vishwakarma Institute of Technology

B.Tech in Computer Science and Engineering (IoT, Cybersecurity & Blockchain)

Aug. 2024 – 2028 (Present)

Pune, India

• CGPA: 9.09 Patents: 7 Research Paper: 1

EXPERIENCE

Algo Analytics Pvt. Ltd.

Cybersecurity Intern

Dec. 2025 – Mar. 2026

Pune, India

Algo Analytics Pvt. Ltd.

Full Stack Intern

Jul. 2025 – Nov. 2025

Pune, India

Yantriki Soft

Software Development Engineer (Industrial Project)

Feb. 2025 – Jun. 2025

Pune, India

PROJECTS

Decentralized Ticketing Platform

- Built a **blockchain-based** ticket booking platform using Ethereum smart contracts (ERC-20 & ERC-721) with wallet-based role access via Hardhat and React

MediTrack – Smart Automatic Drug Dispenser | Indian Patent Published

- Built an **Arduino Uno**-controlled system combining automated pill dispensing (servo motor + rotating tray) and guided liquid dispensing (LED indicators) into a single integrated unit
- Incorporated **AI-based ingestion verification** via a privacy-cap camera triggered by a touch sensor, with adherence data logged and synced to a mobile app

Retail Causal AI | GNN-Causal-RL Retail Analytics Platform | Patent Filed

- Built an end-to-end retail intelligence platform integrating **demand forecasting** (Gradient Boosting), **inventory optimization** (RL/PPO), and **causal promotion analysis** (PSM, DiD, DML)
- Modelled cross-product relationships via **Spectral GNN** and explained predictions with **SHAP**; achieved demand forecast MAE of 5 on real-world retail data; built with React and FastAPI

InnoVelty AI – Idea Novelty Analyzer

- AI-powered tool that evaluates idea novelty against patents and research papers using **LLMs**, generating novelty scores and personalized improvement suggestions

GitGrade – AI Coding Mentor

- Evaluates public GitHub repositories to generate a **performance score**, summary, and personalised improvement roadmap based on the developer's actual codebase

Student-Pal – Python Productivity Suite

- Comprehensive suite featuring an **AI Flashcard Generator**, MCQ Generator, CGPA Calculator, and Physics Solver built with Python and Streamlit

SKILLS

Languages : Python, Java, JavaScript, TypeScript, C++, C, Solidity

Web Technologies : HTML, CSS, Bootstrap, jQuery, React

Libraries & Tools : Streamlit, TensorFlow, OpenCV, Mediapipe, SpaCy, NumPy, Pandas, Matplotlib, Git, GitHub

Databases : MySQL, MongoDB, PostgreSQL

AI / ML : Gemini API, AssemblyAI

OS : Windows, Kali Linux

Other : Arduino, Raspberry Pi, Figma, Power BI, Looker, Excel, Cisco Packet Tracer, WEKA, Wireshark, Nmap, John The Ripper, Hydra, hashcat, OWASP ZAP, GPG
